Frequency Conversion

Export Frequency Conversion

1. Remove the cover from the unit and locate 6 pin jumper labeled J29. Move the shorting block from it's current position to the back/right position as shown.
2. Re-Assemble the unit and check All Bands for Proper operation.

NOTE: The Unit ships from the factory with the J29 jumper block on Pins 1 and 2 which works on 28 MHz only.

WARNING! Not Legal For Class D CB Use In The U.S.A.
